Instructional Course - The Sagittal Profile

Since its foundation in 2006,

SOSORT has worked to bring together researchers and clinicians working in the field of conservative management of spinal deformities. This year we invite all to participate in our Pre-Conference Education Session on 3rd May 2017 where the focus this year will be on 'Management of Sagittal Deformities' before the initiation of our Scientific Conference from 4th - 6th May 2017.

Research Course

This year we are also proud to offer another half-day Post Meeting 'Research Course' on 6th May 2017. This course is always incredibly popular and informative for all participants who wish to expand their knowledge and understanding on research protocols, planning and development.

Conference Program

SOSORT

has become a valuable asset for all participants to share ideas and discuss problems with their colleagues internationally and we urge all members this year to take this

"Why Idiopathic scoliosis is a Horizontal plane deformity?"

Hubert Labelle
Professor of
Surgery, Head of
orthopedics and
Titular of the Motion

Sciences Research Chair at University
of Montreal.

***"A new paradigm for optimizing
brace treatment in adolescent
idiopathic scoliosis "***

philosophy of co-operation and discussion to make this
year's conference the success that our patients demand!

Lyon is a historic city designated as a UNESCO world heritage site. Enjoy the rich history of the town including the tradition of silk-weaving. Among numerous examples, Lyon is the place where Auguste and Louis Lumière invented the "Cinématographe" in 1895. Of course you will enjoy the French cuisine and wine in this gastronomic city. It will be an unforgettable experience with the Bocuse's gala dinner.
